The Frame Factory of A. Joseph Nurre Again Burned Down.

At 11:44 o'clock last night an alarm of fire was given to Engine Company No. 4 by Alderman Mulvihill to the effect that A. Joseph Nurre's moiding, frame and mirror factory, on the corner of Broadway and Bedinger alley, was on fire. The Fours were quickly on the grounds, but soon found that the fire, which was in the rear of the third and fourth stories, was almost beyond their control, and a general alarm from Box 41 was turned in, which brought out the entire Department. By this time the entire rear end of the building above the second story was burning furiously, and in spite of the many streams of water which were poured upon it, continued to spread through the building. At 2 o'clock the roof fell in, and the whole upper portion of the factory broke out in a mass of flames, which made it necessars to remove the ladders and play on the flames from the street below. The material in the building, however, was nearly all consumed, and the corner of saking a shade more for small jobbing and holders asking a shade more for small jobbing obtained.

COTTON—Steady and uniet market and no material change. Stock market and Joseph Nurre's molding, frame and mirror ever, was nearly all consumed, and the flames began to die opt. By 4 o'clock little remained but the blackened ruins.

remained but the blackened ruins.

The building is a five-story brick, and has been but recently rebuilt, having been destroyed by fire on the 28th of last May. The cellar contained the boiler and engine and a lot of lumber. The first and second stories contained the machinery. The third story was used as a store-room. The fourth floor was used as a store-room. The fourth noor was occupied by the workmen, and the fifth was filled with cut lumber. The building cost about \$13,500. The stock in the third-story was valued at about \$20,000, and the total value of stock and machinery will

range from \$50,000 to \$60,000.

The factory employed about eighty-five hands, and when work ceased, at 5:30 o'clock last evening, the fires were all supo clock has evening, the fires were all sup-posed to be out, as usual. Fifteen minutes before the fire was discovered the private watchman made a tour of the building, and could see nothing wrong.

THE LOSS AND INSURANCE.

The fire was still smoldering at 9 o'clock this morning and until an hour after this the engines kept on throwing streams of

water upon the ruins.

Mr. Nurre has not yet examined fully into the nature of the loss and insurance.

The former will undoubtedly amount to \$75,000, as he had an unusually heavy and costly amount of stock in the building. He estimates his loss on this at over \$30,000. The machinery was but little damaged, and this was covered by insurance. The in-surance on the stock will not reach over \$10,000. On the building and machinery the insurance will probably amount to \$40,000.

The following are the statistics of the insurance in foreign companies:
